Key: "-" = entry as in Campaign; "x"= unit out of play; "m"= unit begins on map. Different **turn** or hex of entry are given if needed.

*- The 270/68r asset unit enters only if Tilsit is Russian controlled at entry. If it does enter, the 68 r division enters at [-2] strength. If the asset unit does NOT enter, the division enters at full strength. [I'm inclined to treat the asset unit as a detachment even though it is not specifically labelled as such.]

Notes:

(1) Substitutions are given (allowed or required) for units on the map. Some of these units have the option of appearing on the map without substituting for the component unit(s). In those cases, entry locations with [step reductions] are given. See 16.2.

(2) Reinforcements with different arrival times in a scenario than in the campaign are denoted in **bold, underlined** font, unless the unit starts the campaign on the map. The German KG corps also starts scenario 29.7 on the map, except one unit which arrives normally. (Those Russians which arrive on GT 2 and 3 also do not receive a separate listing for 29.7.)

(3) Asset units, including detachments, are named in *italic*, and sometimes also using the term "asset" for clarity.

(4) Remember the German 3LW Corps begins the game as part of the A-H FIRST Army.
